

“THIS ISN'T A TYPICAL INTERNSHIP PROGRAM:

Do you own a macbook? Are you Interested in developing mobile apps on IOS (Swift language)? OR Interested in being a full stack app developer on Android (Kotlin + Firebase)?

Apply now to this 3 months internship program and get the opportunity to become a partner in our startup after completing your internship!

About Us: We are a dynamic startup at the forefront of digital mental health innovation, committed to providing accessible and effective support to individuals, they need, across the globe. Our mobile application harnesses the power of AI, to create a safe, supportive and stigma free space where users can connect, share, and access resources to improve their mental well-being.

We are seeking 3 new highly motivated Mobile App Development interns/ partners/ co-founders to join our team and contribute to the ongoing enhancement of our Android and iOS applications.

Position Overview for Android Developers: As a team member, you will play a pivotal role in building and enhancing Android applications using Kotlin, a modern programming language that is quickly becoming the standard for Android development. Your responsibilities will encompass both front-end and back-end development, creating intuitive and dynamic user interfaces while leveraging the robust capabilities of Firebase for backend services.

Position Overview for iOS Developers: As an iOS Front-End Developer in the team, you will be responsible for creating and implementing user interface components for iOS applications using Swift, UIKit. Your role includes developing interactive, high-performance applications and ensuring a seamless, efficient, and visually appealing user experience.

As a part of our development team, you will collaborate with UI/UX designers to translate design visions into reality, optimize applications for maximum speed and scalability, and maintain code quality and organization.

Needless to mention, you will have the opportunity to work closely with our experienced developers and gain hands-on experience in building and optimizing mobile apps that positively impact users' lives.

Requirements:

- Pursuing a degree in any field but must have passed 2nd year of graduation.
- Proficiency in Kotlin for Android app development and Swift for iOS app development.
- Familiarity with Google Firebase or other cloud-based platforms.
- Strong problem-solving skills, attention to detail and high work ethics.
- Ability to work effectively in a fast-paced, collaborative environment.
- Excellent communication, interpersonal skills and potentially skills to lead.

Benefits:

- Gain hands-on experience in mobile app development within a supportive and innovative startup environment.
- Opportunity to work closely with experienced developers and mentors.
- Get to choose your own work schedule, meaning you can integrate it easily with any other busy schedules you have.
- Flexible working hours and complete remote work
- Potential for CTO cum Partner in the company, or extended internship based on performance.
